Sales Volume (Consolidated)

- Legacy operations saw a sharp downturn in Q1FY26, driven by abnormally high input costs that peaked at ₹56–57 per kilogram during April-May, 2025.
- Gross margin of standalone business fell to 30%, down from 36% in Q4 FY25, driven by a surge in raw material prices.
- Capacity utilization declined to 95%, down from 99% in the previous quarter, reflecting weakened demand in both the spinning and non-woven segments.
- Capacity utilization of Warangal operations declined to 55%, down from 63% in the previous quarter.

- Operational revenues at both standalone and consol basis remain stable amid market headwinds;
- EBITDA margins of subsidiaries business remained intact with diversification in customer base;
- Operating expenditures, apart from raw material costs, were broadly in line with last quarter's levels.
- In line with our strategic move, we have been able to increase share of exports of consolidated business from 8% of total revenue to 12% on q-o-q basis.
